ABSTRACT
UPDATED—May 17, 2018.

ACM Classification Keywords
H.5.m. Information Interfaces and Presentation (e.g. HCI): Miscellaneous; See http://acm.org/about/class/1998/ for the full list of ACM classifiers. This section is required.

Author Keywords
HCI; Human-Computer-Interaction; Mobile App; Tagebuch; Android; Java

INTRODUCTION
MOTIVATION
Background information about the problem, tasks, and users

RELATED WORK
Other solutions to this problem or similar problems Any previous work that you incorporated into your solution?

DESIGN
Description of the design of your final App Reasons for your design choices, e.g. what you learned from the earlier prototyping steps

IMPLEMENTATION
Brief(!) description of how the App was implemented (toolkits, languages, platforms) Any serious implementation challenges you encountered and how you handled them

EVALUATION
How did we evaluate?
Briefly describe the 3-4 usability tasks + the questionnaire; Describe how you conducted the study (number of participantes, sequence of steps in the study, etc.)

Results of our evaluation
Explain what you learned about your App: strengths and weaknesses Explain implications for design that you derived from the findings, and how you further improved the App respectively

REFLECTION
Give a clear separation of tasks between the group members for the entire project: you have to detail who did what for this milestone. What were important lessons you learned from this course

CONCLUSIONS AND FUTURE WORK
Summarize the main strengths and weaknesses of your approach and implementation Give an outlook into intersting next steps that could be done building up on your work
